

Scoop's 'Bow Type' Single Mode drop cable is designed for FTTX applications. The outer jacket is made from UV resistant material and suitable for both indoor and outdoor installations. The cable is reinforced with two phosphate wires to improve crush resistance, pull strength and provide high bend tolerance during installation.

SPECIFICATIONS

|                     |                               |
|---------------------|-------------------------------|
| Fibre Type          | Single Mode (G657A2)          |
| Fibre Count         | 1                             |
| Fibre Attenuation   | 1310/1550nm: ≤0.35/0.22db/km  |
| Jacket Material     | Low Smoke Zero Halogen (LSZH) |
| Strength Member     | Dual 0.45mm Phosphate Wires   |
| Outer Diameter (mm) | 2mm x 3mm                     |
| Temp. Range         | -40~+60 °C                    |
