

Micro UPS DC to DC Lithium-Ion UPS

The Micro UPS delivers clean, automatic, reliable, constant power to small DC devices during power outages or where grid power is not available. The DC-to-DC Micro UPS models have various power output options such as USB, DC, and PoE output (on certain models). The Micro UPS series is ideal for backing up IP Cameras, Routers and other 12V devices.

Unlike a traditional powerbank that solely provides backup power when needed, the Micro UPS remains in-line between your device and the power source and modulates the incoming power feed to prevent damage to your sensitive electronic equipment.

Switchover to the Micro UPS in the instance of power outage is automatic and instantaneous.

Max Output

17W

USB Interface

DC Interface

PoE Interface

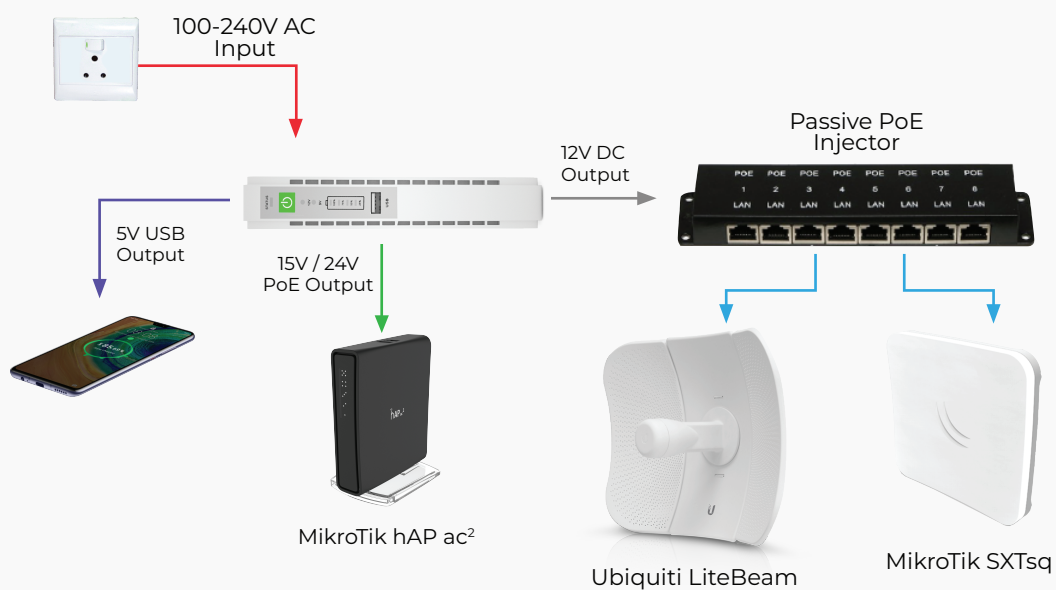

Battery Capacity

4 x 2200mAh Li-ion Batteries

Output	USB Interface	DC Interface	PoE Interface
Output Voltage (selectable)	5V DC	9V / 12Vdc	15Vdc / 24Vdc
Output Power & Current	1.0A / 5W	1.0A / 12W	0.6A / (15V 10W) or (24V 15W)
Output Polarity			+4,5pins -7,8pins

→ 12V DC Output

→ 15/24V Passive PoE Outut

→ 5V USB Output

→ 100-240V AC Input
